ANNUAL STREET RESURFACING PROJECT SET TO BEGIN

City Council Awarded \$4 Million Contract in Early April

PLEASANTON, Calif. — On April 17, 2018, the City Council awarded the 2018 Street Resurfacing Project to the low bidder, MCK Services, Inc. This year, the project includes approximately 1,350,000 square-feet of pavement restoration (see list below).

“The overall goal of the project is to prolong the useful life of the existing street infrastructure, while providing a safe and smooth riding condition by resurfacing existing streets with a new layer of asphalt,” said Director of Engineering, Steve Kirkpatrick.

Construction covers a wide range of activities and includes: full-depth pavement repair in isolated areas; pavement milling and grinding; placement of new layer of asphalt, and replacing traffic striping and pavement markers. To minimize impacts to traffic and businesses, construction will be performed in phases, completing one area of the city before moving to the next.

The work includes Main Street and First Street in downtown, which will be completed first before the start of the busy summer months and downtown activities, such as the Good Guy Car show and Alameda County Fair.

Please be aware that most of the construction activities on Main Street will be performed Sunday through Thursday nights from 10 p.m. to 7 a.m. Main Street will to be closed to vehicle traffic during the nighttime work hours, and there will be traffic impacts and detours around the work area.

The total anticipated project cost is approximately \$4.3 million and is funded through the gas tax, vehicle registration fee, Measure B, Measure BB, SB1, and General Fund money. The City expects the project to be complete by the end of August 2018.
